**(100) Service Quality Improvement Reporting
Data Collection Form**

FCC Form 481

 OMB Control No. 3060-0986/OMB Control No. 3060-0819
July 2013

<010>	Study Area Code	330872
<015>	Study Area Name	CUBA CITY EXCHANGE
<020>	Program Year	2016
<030>	Contact Name - Person USAC should contact regarding this data	Deb Egli
<035>	Contact Telephone Number - Number of person identified in data line <030>	6087443500 ext.
<039>	Contact Email Address - Email Address of person identified in data line <030>	deb@casteca.com
<110>	Has your company received its ETC certification from the FCC?	(yes / no) <input type="radio"/> <input checked="" type="radio"/>
<111>	If your answer to Line <110> is yes, do you have an existing §54.202(a) "5 year plan" filed with the FCC?	(yes / no) <input type="radio"/> <input type="radio"/>

If your answer to Line <111> is yes, then you are required to file a progress report, on line <112> delineating the status of your company's existing § 54.202(a) "5 year plan" on file with the FCC, as it relates to your provision of voice telephony service.

- <112> Attach Five-Year Service Quality Improvement Plan or, in subsequent years, your annual progress report filed pursuant to 47 C.F.R. § 54.313(a)(1). If your company is a CETC which only receives frozen support, your progress report is only required to address voice telephony service.

330872w1112.pdf

Name of Attached Document

Please select the appropriate responses below (Yes, No, Not Applicable) to confirm that the attached document(s), on line 112, contains a progress report on its five-year service quality improvement plan pursuant to §54.202(a). The information shall be submitted at the wire center level or census block as appropriate.

- <113> Maps detailing progress towards meeting plan targets
- <114> Report how much universal service (USF) support was received
- <115> How much (USF) was used to improve service quality and how support was used to improve service quality
- <116> How much (USF) was used to improve service coverage and how support was used to improve service coverage
- <117> How much (USF) was used to improve service capacity and how support was used to improve service capacity
- <118> Provide an explanation of network improvement targets not met in the prior calendar year.

Cuba City Telephone Exchange Company, Inc.
Line 112 – Annual Progress Report on Five-Year Service Quality Improvement Plan

As required in 47 C.F.R. § 54.313(a)(1), the following pages provide the Company's annual progress report on the five-year service quality improvement plan filed in 2014 with the Form 481 that described the proposed improvements and/or upgrades over the next five years to the applicant's network throughout the Company's service area.

47 C.F.R. § 54.313(a)(1) specifies that recipients should submit "[a] progress report on its five-year service quality improvement plan pursuant to § 54.202(a), including maps detailing its progress towards meeting its plan targets, an explanation of how much universal service support was received and how it was used to improve service quality, coverage, or capacity, and an explanation regarding any network improvement targets that have not been fulfilled in the prior calendar year. The information shall be submitted at the wire center level or census block as appropriate."

This document describes the Company's progress report on the five-year plan, pursuant to 47 C.F.R. §54.313(a)(1), including maps explaining the Company's progress towards meeting deployment targets, the amount of universal service support received, how support was used to improve service quality, coverage, or capacity, and an explanation regarding any network improvement targets that have not been fulfilled in the prior calendar year. The information regarding the total amount of universal service support received is broken out separately by the amount spent on capital expenses and the amount spent on operating expenses. The information regarding planned and/or completed network improvements shall be at the wire center level or census block, as appropriate.

QUANTIFICATION OF AMOUNT OF USF SPENT ON CAPITAL VERSUS OPERATING EXPENSES:

Line 114 of Form 481 requests a quantification of how much USF was received for the Company's service area and that the amount be broken out separately by the amount spent on capital expenditures and the amount spent on operating expenses. For the period from January 1, 2015 through June 24, 2015, the Company is expected to receive \$98 Thousand in federal USF revenue, including Interstate Common Line Support ("ICLS") and Connect America Funds (CAF) which is used approximately \$65 Thousand Million for capital expenditures and \$33 Thousand to cover a portion of the Company's operating expenses. Please note that since the instructions were to provide data up to the filing date of the Form 481, these numbers, as well as the data on the following pages are estimates since the general accounting books of the Company are not closed for June 2015 as of the date of this filing.

Cuba City Telephone Exchange Company, Inc.
Line 112 – Five-Year Service Quality Improvement Plan (Cont'd)

QUANTIFICATION OF AMOUNT OF USF SPENT TO IMPROVE SERVICE QUALITY:

Line 115 of Form 481 requests that the progress report specify how much USF support was used to improve service quality, at the wire center level or census block, as appropriate.

QUANTIFICATION OF AMOUNT OF USF SPENT TO IMPROVE SERVICE COVERAGE:

Cuba City Telephone Exchange Company, Inc.
Line 112 – Five-Year Service Quality Improvement Plan (Cont'd)

QUANTIFICATION OF AMOUNT OF USF SPENT TO IMPROVE SERVICE CAPACITY:

Line 117 of Form 481 requests that the progress report specify how much USF support was used to improve service capacity, at the wire center level or census block, as appropriate. The following summarizes how support was used for capital expenditure to improve service capacity.

Cuba City Telephone Exchange Company, Inc.
Line 112 – Five-Year Service Quality Improvement Plan (Cont'd)

Please note that the answers to lines 115, 116 and 117 overlap and are very difficult to differentiate. When you install or upgrade additional fiber and DLCs, you typically improve service quality, provide additional service coverage and increase service capacity. It is only an approximation to separately identify if the fiber and DSL increased service quality versus improving service coverage or increasing service capacity.

EXPLANATION OF ACHIEVEMENT OF NETWORK IMPROVEMENT OBJECTIVES:

Line 118 requests an explanation of reasons why network improvement targets were not achieved, if applicable, at the wire center level or census block, as appropriate. While the five-year plan filed in 2014 did not have half-year projections, the Company believes it is currently on track to meet the annual 2015 plan. Of course, circumstances for the remainder of 2015 can change where it is not able to meet its network improvement objectives primarily for the following reasons (not in any particular order):

- 1) **Permits:** It is not possible to predict the ability to obtain all necessary permits, including easements and rights-of-way, within the five-year time-frame required to complete the capital expenditures included in the Company's five-year plan. Permits can be, and often are, delayed significantly by various governmental agencies and those delays are totally outside the control of the Company.
- 2) **Weather Issues:** It is not possible to predict the impact of the weather on the installation of the capital expenditures included in the Company's five-year plan. For example, if the ground is frozen, the timing of installing facilities can be significantly delayed and those delays are totally outside the control of the Company.
- 3) **Lead Time to Obtain Materials from Vendors:** It is not possible to predict when a material critical for the capital expenditures included in the Company's five-year plan may come into a shortage situation. For example, currently the industry is experiencing a shortage of fiber optic cable where there is a significant lead time to obtain fiber optic cable. Delays of this nature are impossible to predict and are totally outside the control of the Company.
- 4) **Lead time to get Contractors to Install Facilities:** Just as with the materials, the Company has experienced times when it was not able to obtain contractors to install the equipment because the Company is not large enough compared to other firms wanting the contractor to do work for them. Therefore, the Company had to wait until much later than anticipated to get the contractor to come install the facilities for them. Once again, delays of this nature are impossible to predict and are totally outside the control of the Company.

Cuba City Telephone Exchange Company, Inc.
Line 112 – Five-Year Service Quality Improvement Plan (Cont'd)

PROGRESS REPORT ON THE FIVE-YEAR PLAN:

As described in the five-year plan, the Company provides service primarily through the use of fiber optic cable and electronics between the central offices and the subscriber terminal equipment (e.g., Digital Loop Carriers (“DLCs”)) in the field. Copper cable is still in use and most frequently, the last mile facilities are generally provided over copper. The Company has a certain amount of fiber-to-the-premise (“FTTP”) facilities, as well. It is the company’s intention to continue to install fiber optic cable and electronics, wherever feasible. The company has begun the transition from the TDM-based network to an IP-network and is continually assessing the most cost-effective technology solutions to provide our customers the services they request.

The company only has one exchange with one wire center; therefore, the progress report on the five-year plan is presented at the Company level (which is also the wire center level). Estimated regulated capital expenditures for the RLEC from January 1, 2015 through June 24, 2015, as projected as part of the total 2015 capital expenditures in the five-year plan filed in 2014, in the Company’s exchange are estimated to be as follows:

Cuba City Telephone Exchange Company, Inc.
Line 112 – Five-Year Service Quality Improvement Plan (Cont'd)

Cuba City Telephone Exchange Company, Inc.
Line 112 – Five-Year Service Quality Improvement Plan (Cont'd)

COMMUNITY ANCHOR INSTITUTIONS:

Line 2020 of the Form 481 requests per 47 C.F.R. § 54.313(e)(ii), the number, names, and addresses of community anchor institutions to which the ETC began offering broadband service in the preceding calendar year. The Company already provides broadband service to all of the community anchor institutions in the serving area. If the community anchor institution requests increased bandwidth, the Company works with the institution to determine and supply the broadband service that best fits the needs of the institution. No new community anchor institutions received broadband service from the Company in the preceding calendar year.

CONCLUSION:

The Company is doing an excellent job progressing on the five-year service quality improvement plan filed in 2014 with the FCC with the Form 481. The Company is continuing to improve and upgrade facilities in order to provide customers with the highest quality voice and broadband service in the most cost-effective manner. This includes shortening the length of the loops, as needed, in order to provide greater bandwidth to the customer, augmenting and upgrading the interexchange facilities, as needed, to provide greater speeds and sufficient facilities for special access circuits, including, but not limited to, dedicated facilities to wireless towers, modifying switching equipment, as needed, in order to provide the services and features desired by the customer, and adding/replacing general support equipment, as needed, in order to continue to operate as a company and provide service to the end user.

The map attached to the end of this report shows the status of the projects performed from January 1, 2015 through June 24, 2015, including a description of the stage the project (e.g., project engineered versus project completed).

CUBA CITY TELEPHONE DISTANCE COMPANY
CUBA CITY, MISSOURI

NEW FIBER OPTIC LINE

New Fiber Optic Cabinet

File name: 330872wi510.pdf

Cuba City Telephone Exchange Company, Inc.
Line 510 - Compliance with Service Quality Standards and Consumer Protection

As required in 47 C.F.R. § 54.313(a)(5) for High-cost Recipients, the following is a detailed description of how the Company complies with Service Quality Standards and Consumer Protection Rules.

SERVICE QUALITY STANDARDS: The Company abides by the State Commission's requirements for service quality. All required reporting is done with the Company in full compliance of the service quality standard requirements.

CONSUMER PROTECTION RULES:

The Company developed and implemented a Customer Proprietary Network Information ("CPNI") Compliance Manual and has appointed a CPNI Compliance Officer. Annually, the Company requires all employees to certify that they have reviewed and understand the CPNI Compliance Manual and that they understand that any violation of the Company's CPNI procedures may result in disciplinary action up to and including dismissal. The Company files an annual report with the Federal Communications Commission ("FCC") certifying compliance with the FCC's CPNI rules.

The Company also developed and implemented an Identity Theft Prevention Program Manual and has appointed a Red Flag Coordinator. Annually, the Company requires all employees certify that they have reviewed and understand the Identity Theft Prevention Program Manual. Further, employees must certify that they understand that any violation of the Company's identity theft prevention procedures may result in disciplinary action up to and including dismissal.

**Cuba City Telephone Exchange Company, Inc.
Line 610 – Functionality in Emergency Situations**

As required in 47 C.F.R. § 54.313(a)(6) for all high cost recipients, which includes the Company, and as set forth in 47 C.F.R. § 54.202(a)(2), the following provides a detailed description demonstrating that the Company has the ability to remain functional in emergency situations, including a demonstration that 1) it has a reasonable amount of back-up power to ensure functionality without an external power source, 2) is able to reroute traffic around damaged facilities, and 3) is capable of managing traffic spikes resulting from emergency situations.

OVERALL RESPONSE TO EMERGENCY SITUATIONS: The Company has a comprehensive disaster recovery plan (also called a “continuity plan”) that was developed and implemented for the Company specifically to deal with emergencies. It has detailed, specific steps that are to be taken for each type of emergency.

POWER: In order to function in an emergency, the Company has a combination of batteries and emergency generators. Some locations have permanent emergency generators with fuel tanks; whereas, other locations require a portable generator to be brought to the location to recharge the on-site batteries. The company owns several portable generators that technicians can take out to recharge the batteries. For example, the company’s central offices have automatic stand-by generators to run the entire offices. The digital loop carrier (“DLC”) sites also have battery back-up.

REROUTING TRAFFIC AND REDUNDANCY: The Company has established 100% redundant E-911 trunks and SS-7 routes. In addition, the network was designed with redundancy, wherever possible, especially in the backbone network. Where it is not redundant, the Company has the ability to redirect most backbone traffic. In cases where there is no redundancy, it is due to the extreme cost of a 100% redundant network. For example, the loop to the customer location is typically not redundant, especially for residential customers. This is because it would not be cost effective to build totally separate facilities for the “last mile” to the customer.

MANAGING TRAFFIC SPIKES: The Company realizes that when a catastrophe happens, everyone immediately tries to contact friends and family to make certain they are all right. The Company has designed the network to have excess capacity on its backbone network. For example, on Mother’s Day, the company handles traffic without the customer receiving the “All Trunks Busy” message which demonstrates the Company’s ability to handle peak traffic spikes.

File name: 330872wi1010.pdf

Cuba City Telephone Exchange Company, Inc.
Line 1010 – Voice Services Rate Comparability

As required in 47 C.F.R. § 54.313(a)(10), any recipient of high-cost support shall provide a letter certifying that the pricing of the company's voice services is no more than two standard deviations above the applicable national average urban rate for voice services, as specified in the most recent public notice issued by the Wireline Competition Bureau and Wireless Telecommunications Bureau. The following provides the Company's support for Line 1010 - Description of Voice Service Rate Comparability.

As of January 1, 2015, the Company charges the following fixed voices prices for residential service:

Flat Rate Residential Service	\$14.00
Residential State Subscriber Line Charge	0.00
State Universal Service Charge Fee	0.50
Mandatory Extended Area Service	0.00
Residential Federal Subscriber Line Charge	<u>6.50</u>
Total Residential Fixed Voice Charges	<u>\$21.00</u>

Since the total for residential fixed voice that the Company charges, as shown above, is below the \$46.96, which is two standard deviations above the applicable national average urban rate for voice services, announced by the FCC Wireline Competition Bureau in the Public Notice released on March 20, 2014 (DA 14-384), the Company hereby certifies that it is in compliance with 47 C.F.R. § 54.313(a)(10).

Cuba City Telephone Exchange Company Lifeline Terms and Conditions

This program can help low-income customers reduce their telephone bills. Lifeline makes telephone service more affordable for income-eligible households by reducing the basic monthly charge for one telephone line.

How Much Can I Save Per Month?

Lifeline will generally reduce the cost of monthly telephone service for eligible households by \$10.00. If the cost of monthly traditional telephone service is more than \$25.00, a credit will be issued so that the monthly charge is no more than \$15 for a basic residential line, 120 local calls, 911 costs and the Federal Subscriber Line Charge (SLC).

Lifeline customers who choose a prepaid wireless service will receive a set number of minutes each month (at no charge) equivalent to the \$10.00 credit on landline services. Additional charges will apply if you have higher usage. The Company's voice lifeline plan includes unlimited local minutes-of-use within the toll-free calling area. The Company's voice lifeline plan does not include any free minutes-of-use for toll unless a "bundled minutes" package is chosen.

Lifeline Providers

Most wireline and wireless providers offer a Lifeline service. A list of Lifeline Providers can be found on the Public Service Commission website at: psc.wi.gov/Lifeline

How Do I Apply?

First, contact your telephone service provider and ask to apply for **Lifeline** assistance for Wisconsin residents. The service provider will need to verify that you are eligible.

If you are currently receiving benefits from one of the programs listed in this brochure, but your **Lifeline** application was denied, contact your case worker or county benefits specialist.

NOTE: If you get a **Lifeline** service from one provider, you cannot also get **Lifeline** from another provider. For instance, if you have a **Lifeline** service in your home, you are not eligible to also get a Lifeline supported pre-paid wireless service.

Who is Eligible to Participate in Lifeline?

Eligible customers include those that receive benefits from:

- Wisconsin Homestead Tax Credit (Schedule H)
- Wisconsin Works (W2)
- Medical Assistance (MA)
- Badger Care
- Supplemental Security Income (SSI)
- Food Stamps
- Low Income Home Energy Assistance Program (LIHEAP)
- Federal Public Housing Assistance
- TANF
- National School Lunch Program

Residents of tribal lands may also qualify for **Lifeline** and **Link-Up** (assistance with the cost of initially getting telephone service) by participating in a federal tribal assistance program and may be eligible for additional credits. Please contact your Tribal Authority for additional information.

Lifeline Facts and Benefits

- A **Lifeline** customer's local telephone service will not be disconnected for non-payment of long distance

charges.

- Being a **Lifeline** customer **does not** protect you from disconnection if you do not pay your local telephone bill.
- 900-number blocking and other forms of toll blocking are available at no charge.
- If you apply for Lifeline telephone service and have an outstanding debt with a telecommunications provider, payment arrangements must be negotiated before the telephone service will be installed.

Questions?

Your local telephone service provider should be your first contact if you have questions regarding **Lifeline**. If you have further questions or a complaint about **Lifeline** then call the Public Service Commission.

The Public Service Commission of Wisconsin is an independent state agency that oversees more than 1,100 Wisconsin public utilities that provide natural gas, electricity, heat, steam, water and telecommunications.

Cuba City Telephone Exchange Company, Inc.
Line 3010 – Progress Report on Five-Year Plan Milestone Certification

As required in 47 C.F.R. § 54.313(a)(1), the following pages provide the Company's annual progress report on the five-year service quality improvement plan filed in 2014 with the Form 481 that described the proposed improvements and/or upgrades over the next five years to the applicant's network throughout the Company's service area.

47 C.F.R. § 54.313(a)(1) specifies that recipients should submit "[a] progress report on its five-year service quality improvement plan pursuant to § 54.202(a), including maps detailing its progress towards meeting its plan targets, an explanation of how much universal service support was received and how it was used to improve service quality, coverage, or capacity, and an explanation regarding any network improvement targets that have not been fulfilled in the prior calendar year. The information shall be submitted at the wire center level or census block as appropriate."

This document describes the Company's progress report on the five-year plan, pursuant to 47 C.F.R. § 54.313(a)(1), including maps explaining the Company's progress towards meeting deployment targets, the amount of universal service support received, how support was used to improve service quality, coverage, or capacity, and an explanation regarding any network improvement targets that have not been fulfilled in the prior calendar year. The information regarding the total amount of universal service support received is broken out separately by the amount spent on capital expenses and the amount spent on operating expenses. The information regarding planned and/or completed network improvements shall be at the wire center level or census block, as appropriate.

QUANTIFICATION OF AMOUNT OF USF SPENT ON CAPITAL VERSUS OPERATING EXPENSES:

Line 114 of Form 481 requests a quantification of how much USF was received for the Company's service area and that the amount be broken out separately by the amount spent on capital expenditures and the amount spent on operating expenses. For the period from January 1, 2015 through June 24, 2015, the Company is expected to receive \$98 Thousand in federal USF revenue, including Interstate Common Line Support ("ICLS") and Connect America Funds (CAF") which is used approximately \$65 Thousand Million for capital expenditures and \$33 Thousand to cover a portion of the Company's operating expenses. Please note that since the instructions were to provide data up to the filing date of the Form 481, these numbers, as well as the data on the following pages are estimates since the general accounting books of the Company are not closed for June 2015 as of the date of this filing.
